

ERRATA

S. K. TALAPATRA, B. C. MAITA, B. TALAPATRA and B. C. DAS: Spectabiline, a new dihydrofuroquinol-4-one alkaloid from Lemonia spectabilis Lindl.

Tetrahedron Letters No. 54, pp. 4789-4794 (1969)

Since the publication of this article, the work of C.C.J. Culvenor and L.W. Smith has been brought to the authors' attention. In view of the fact that the name Spectabiline has been accepted for a pyrrolizidine alkaloid isolated from Crotalaria spectabilis, the authors wish to withdraw this name and assign the name "Lemobiline" for the new alkaloid of Lemonia spectabilis.
