

## ERRATA

H G Kuivila and C H -C Pian, Chemistry of organoditins -I Stereochemistry of dehalogenation of vicinal dihalides, *Tetrahedron Letters*, 2561 (1973)

(a) In Table 1, under the heading 'isomer' the word *erythro* should appear in the line with the first row of figures of the second set

(b) In the last column of the Table, headed '*cis*', the second number up from the bottom should be 11 3 instead of 85 1

D J Pasto and J K Borhardt, Partial resolution and correlation of the absolute configuration of (-)-(R)-2-phenylisobutenyldicyclopentane, *Tetrahedron Letters*, No 27, 2517 (1973)

pg 2518, line 3, reading  $([\alpha]_D^{25} + 3.8^\circ)$   
should read  $([\alpha]_D^{25} + 12.1^\circ)$

pg 2519, line 9, reading the optical purity of the ester,  
should read the enantiomeric purity of the ester,

Sidney I Featherman and Louis D Quin, Assignment of structure to isomeric 4-phosphorinanos by  $^{13}\text{C}$  NMR spectroscopy, *Tetrahedron Letters*, No 21, 1955 (1973)

Further study of the  $^{13}\text{C}$  spectrum of the Va-Vb mixture has revealed that the lowfield halves of the  $\text{CH}_3$  doublets were superimposed, leading to incorrect assignments in Table I. Correct values are Va  $\delta$  180.8 ( $^2J_{\text{PC}} = 14.3$ ), Vb,  $\delta$  180.9 ( $^2J_{\text{PC}} = 16.8$  Hz). Assignments to particular isomers were again made on the basis of the conformational effect expressed as Vc, but must be considered tentative only.
