

E R R A T U M

F Ciardelli et al , CHIRALLY PERTURBED  $\alpha$ -NAPHTHYL CHROMOPHORE IN HELICAL POLYMERS,  
Tetrahedron Letters n 22+23, pp 1779-1782 (1975)

The second sentence (rules 2 and 3) of page 1782 should read " The low dissymmetry factor did not permit the detection of optically active bands below 300 nm ", instead of " The high dissymmetry factor did not permit the detection of optically active bands above 300 nm "
