Case Officielle 140, 54037 Nancy Cédex (France)

In the paper with the above title that appeared in Tetrahedron Letters n° 45
p. 3951 (1977) runs 12 and 13 (Table I) have now been dramatically improved and reaction
times 42 h and 60 h must be read 2h¹/₂ and 1h respectively.

Moreover, typographical errors have been enclosed both in the butadiene dimeri-
sation scheme and in the text : 3-vinylcyclohexene must be read, indeed, as 4-vinylcyclo-
hexene.
