X-ray analysis has established that the structure of substance 1 previously reported as the cis isomer is in fact the trans, as shown:

Details of this analysis will be published elsewhere.

We thank Dr. J. P. Springer for structural assistance.

II. THE HYDROXYOXATHIOLANE TO ACYLOIN REARRANGEMENT.

On the third page, the third sentence of the second paragraph should read: "Compound 3, which is somewhat less reactive, yields 2-formylcyclohexanol...." rather than 2-formylcycloheptanone. In the following sentence compound number 6 was erroneously designated 9.
