A NEW SYNTHETIC ROUTE TO PROSTAGLANDINS

E. J. Corey, Koichi Niimura, Yoshitaka Konishi, Shinsuke Hashimoto, and Yasumasa Hamada
Tetrahedron Letters, 27, 2199-2202, (1986).

The first two lines of page 2200 are as follows:

A direct synthesis of **1** from (*S,S*)-tartaric acid via the known diiodide **3**⁸ was also developed. Reaction of **3** with *t*-butyl cyanoacetate (2.6 equiv) and potassium *t*-butoxide (2.4 equiv) in *t*-butyl alcohol at 60° for 18 hr afforded 77% of cyclic ester **4**

These lines were inadvertently omitted.
