

E R R A T A

ASYMMETRIC OXIDATION OF OLEFINS TO VICINAL DIOLS WITH OSMIUM TETROXIDE

M. Tokles and J.K. Snyder, *Tetrahedron Letters*, 27, 3951 (1986).

Structure 1 on page 3951 was inadvertently drawn as the (+)-(S,S)-enantiomer rather than the correct (-)-(R,R)-enantiomer of N,N,N',N'-tetramethylcyclohexane-*trans*-1,2-diamine. The correct (R,R)-structure was shown in Figures 2 and 3, page 3953.

THE STEREOSTRUCTURES OF [1,1'-BICYCLOHEXYL]-2,2'-DIONES: A REASSIGNMENT, Scott E. Denmark, Christopher J. Cramer and Jeffrey A. Sternberg, *Tetrahedron Lett.* 1986, 27, 3693.

In Reference 4 on page 3696 both compounds are labeled C<sub>2</sub>. The correct assignment for the second compound should read:

C<sub>S</sub> isomer: (R\*,S\*)-[1,1'-bicyclohexyl]-2,2'-dione.
