STERESELECTIVE SYNTHESIS OF CIS OR TRANS N-PHENYL 2-PHENYL  
DECAHYDROQUINOLIN-4 ONES BY CATALYZED HETERO-DIELS-ALDER REACTION

C. Veyrat, L. Wartski and J. Seyden-Penne, Tetrahedron Lett., 27, 2981 (1986)

The formulas shown for 3, 4 and 6, 7 have to be interverted. According to X Ray determination of 3 (to be published) in which the heterocyclic ring is boat shaped, the C<sub>2</sub>-Ph and C<sub>9</sub>-H bonds are in a cis relationship.
