

CORRIGENDUM

The Extraordinary Selectivity of Methoxyphenylcarbene: The Case of the Curious "Olefin", R.A. Moss and J. Włostowska, Tetrahedron Lett., 29, 2559 (1988).

In note (17), the text should read: "With authentic 3 now in hand, we have found that a competition between TME and isobutene for MeOCPH at 25°C gives $k_{TME}/k_{iso} = -0.030$." [Not 0.30] The remainder of note (17) is correct as written.
