

C O R R I G E N D U M

Hindered Organoboron groups in Organic Synthesis. 12. The bis(2,6-dimethyl-4-methoxyphenyl)boron  $(DMP)_2B$  group, a new, readily solvolysed Carbanion stabilising group

A. Pelter, R. Drake and M.J. Stewart. Tetrahedron Lett., 30, 3085 (1989).

The final equation (equation 5) should read as follows:-
