

CORRIGENDUM

A. E. Wright, N. S. Burres and G. K. Schulte, Cytotoxic cembranoids from the gorgonian *Pseudopterogorgia bipinnata*, *Tetrahedron Lett.*, **1989**, 30, 3491

It has recently come to our attention that the structures of bipinnatins a-c were previously reported in the manuscript entitled "Structure-activity relationships for the irreversible blockade of nicotinic receptor agonist sites by lophotoxin and congeneric diterpene lactones" by P. Culver, M. Burch, C. Potenza, L. Wasserman, W. Fenical and P. Taylor, *Molec. Pharmacol.*, **1985**, 28, 436. The *Tetrahedron Letters* publication provides detailed spectroscopic evidence for the previously reported structures and for the new compound bipinnatin d.
