On page 1705 the second and third sentences of the second paragraph should read as follows:

Elution with CHCl_3 /petroleum ether 2/1 yielded **4** as an amorphous orange powder. Subsequent elution with $\text{MeOH}/\text{CHCl}_3$ 1/9 resulted in the isolation of **3** as a green amorphous powder.

On page 2536, reference 9 should read as follows:

- 9 Similar results for the cyclopropanation of disubstituted olefins and vinyl ethers with ethyl diazoacetate have been observed, see reference 4c and a) Anciaux, A. J.; Hubert, A. J.; Noels, A. F.; Petinot, N.; Teyssie, P. *J. Org. Chem.* **1980**, 45, 695. b) Recently, Henry and Fraser-Reid published the cyclopropanation using a 5 fold excess of copper powder. Henry, K. J.; Fraser-Reid, B. *Tetrahedron Lett.* **1995**, 36, 8901.
