Due to an oversight, the stereochemistry of structures **2** and **3** in both the manuscript and the graphical abstract is incorrect. The correct stereochemistry is shown below:

The conclusions derived from the study however, are unchanged.

The authors are happy to acknowledge elegant prior synthesis of compounds closely related to the tetracycle (**4**), using a different chemical approach, by Professor Jean-Claude Gramain and coworkers. The following references should have been cited in the paper:
