The authors regret that in Scheme 1 the stereochemistry of the chiral auxiliary of compounds **1–4** was represented incorrectly. Compounds **1–4** derived from (1*R*)-(–)-10-camphorsulphonic acid thus the 10-phenylsulphonylisoborneol unit has *R,S,S* absolute configuration at C1, C2 and C4. The structure of compounds **4** determined by X-ray crystallography is the correct one.
