## Corrigendum

## Corrigendum to "The first example of a catalytic asymmetric aldol-Tishchenko reaction of aldehydes and aliphatic ketones"

[Tetrahedron Lett. 45 (2004) 7549]

Shortly before we submitted the above manuscript for review, Shibasaki and co-workers<sup>1</sup> published a paper on the same subject. We regret that we did not cite this paper in our work.

In this paper, the authors presented the Tishchenko reaction as a useful method for the condensation of aromatic donors and acceptors. Despite the use of aromatic ketones only, this work was the first published example of the Tishchenko reaction as a useful method for overcoming the retro-aldol reaction problem in direct aldol condensations.
