

Tetrahedron Letters

Instructions to contributors

Please follow these instructions carefully to ensure that the review and publication of your paper are as swift and efficient as possible. These notes may be copied freely.

Tetrahedron Letters offers rapid publication of important new developments in organic chemistry. Articles should be in the form of short communications announcing either experimental or theoretical results of special interest.

The contents of papers are the sole responsibility of the authors, and publication shall not imply the concurrence of the Editors or Publisher.

Journal policy

The preferred language of submission is English, but papers in French or German will be considered. Papers are submitted on the understanding that the subject matter has not been previously published and is not being submitted elsewhere. Authors must accept full responsibility for the factual accuracy of the data presented and should obtain any authorization necessary for publication. All papers are sent to referees who advise the Editor on the matter of acceptance in accordance with the high standards required. Referees' names are not disclosed, but their views are forwarded by the Editor to the authors for consideration. Authors are **strongly** encouraged to suggest the names and addresses of suitable referees.

Journal conventions

Nomenclature: Authors will find the following reference books and websites useful for recommended nomenclature. It is the responsibility of the author to provide correct chemical nomenclature.

IUPAC Nomenclature of Organic Chemistry; Rigaudy, J., Klesney, S. P., Eds.; Pergamon: Oxford, 1979.

A Guide to IUPAC Nomenclature of Organic Compounds (Recommendations 1993); Panico, R., Powell, W. H., Richer, J. C., Eds.; Blackwell Publishing: Oxford, 1993.

<http://www.acdlabs.com/iupac/nomenclature>

<http://www.chem.qmul.ac.uk/iupac>

X-ray crystallographic data: Prior to submission of the manuscript, the author should deposit crystallographic data for organic and metal-organic structures with the Cambridge Crystallographic Data Centre. The data, without structure factors, should be sent by e-mail to: deposit@ccdc.cam.ac.uk, as an ASCII file, preferably in CIF format. Hard copy data should be sent to CCDC, 12 Union Road, Cambridge CB2 1EZ, UK. A checklist of data items for deposition can be obtained from the CCDC Home Page on the World Wide Web (<http://www.ccdc.cam.ac.uk/>) or by e-mail to: fileserv@ccdc.cam.ac.uk, with the one-line message, send me checklist. The data will be acknowledged, within three working days, with one CCDC deposition number per structure deposited. These numbers should be included with the following standard text in the manuscript: Crystallographic data (excluding structure factors) for the structures in this paper have been deposited with the Cambridge Crystallographic Data Centre as supplementary publication numbers CCDC... Copies of the data can be obtained, free of charge, on application to CCDC, 12 Union Road, Cambridge CB2 1EZ, UK [fax: +44(0)-1223-336033 or e-mail: deposit@ccdc.cam.ac.uk]. Deposited data may be accessed by the journal and checked as part of the refereeing process. If data are revised prior to publication, a replacement file should be sent to CCDC.

Instructions regarding GenBank/DNA Sequence Linking: Many Elsevier journals cite 'gene accession numbers' in their running text and footnotes. Gene accession numbers refer to genes or DNA sequences about which further information can be found in the database at the National Center for Biotechnical Information (NCBI) at the National Library of Medicine. Elsevier authors wishing to enable other scientists to use the accession numbers cited in their papers via links to these sources, should type this information in the following manner:

For each and every accession number cited in an article, authors should type the accession number in **bold, underlined text**. Letters in the accession number should always be capitalised. (See Example 1 below). This combination of letters and format will enable Elsevier's typesetters to recognize the relevant texts as accession numbers and add the required link to GenBank's sequences.

Example 1: 'GenBank accession nos. **AI631510**, **AI631511**, **AI632198**, and **BF223228**, a B-cell tumor from a chronic lymphatic leukemia (GenBank accession no. **BE675048**), and a T-cell lymphoma (GenBank accession no. **AA361117**'.

Authors are encouraged to check accession numbers used very carefully. **An error in a letter or number can result in a dead link.**

In the final version of the *printed article*, the accession number text will not appear bold or underlined (see Example 2 below).

Example 2: 'GenBank accession nos. AI631510, AI631511, AI632198, and BF223228, a B-cell tumor from a chronic lymphatic leukemia (GenBank accession no. BE675048), and a T-cell lymphoma (GenBank accession no. AA361117)'.

In the final version of the *electronic copy*, the accession number text will be linked to the appropriate source in the NCBI databases enabling readers to go directly to that source from the article.

Characterization of new compounds: All new compounds should be fully characterized with relevant spectroscopic data. Microanalyses should be included whenever possible. Under appropriate circumstances, high resolution mass spectra may serve in lieu of microanalyses, if accompanied by suitable NMR criteria for sample homogeneity.

Supplementary material: Elsevier accepts electronic supplementary material to support and enhance your scientific research. Supplementary files offer the author additional possibilities to publish supporting applications, movies, animation sequences, high-resolution images, background datasets, sound clips and more. Supplementary files supplied will be published online alongside the electronic version of your article in Elsevier web products, including ScienceDirect: <http://www.sciencedirect.com>

In order to ensure that your submitted material is directly usable, please ensure that data is provided in one of our recommended file formats. Supplementary data must be saved in files separate from those for the manuscript and figures, and all file names must be supplied. Supplementary files should either be referred to from within the text of your manuscript in the same way as for figures and tables, or their presence be indicated by adding a paragraph entitled "Supplementary Data" at the end of the manuscript, detailing which data is supplied. In addition, authors should also provide a concise and descriptive caption for each file.

When supplying supplementary material, authors must state whether data files are either (i) for online publication or (ii) to be used as an aid for the refereeing of the paper only. All supplementary data will be subject to peer-review. For more detailed instructions please visit Elsevier's Author Gateway at <http://authors.elsevier.com>, and click on Artwork instructions, then Multimedia files.

Manuscript preparation

General requirements: The article (including artwork) should be no longer than four printed pages. Manuscripts should be printed on

one side of the page only, using black type on good quality white paper. Pages must be numbered. The corresponding author's full mailing address, plus phone and fax numbers and e-mail address should be included. The manuscript should be compiled in the following order: Title, Authors, Affiliations, Abstract, Keywords, Text, References, Captions, Tables, Figures, Schemes.

Graphical Abstracts: Authors must supply a graphical abstract at the time the paper is first submitted. The abstract should summarise the contents of the paper in a concise, pictorial form designed to capture the attention of a wide readership and for compilation of databases. Carefully drawn chemical structures are desired that serve to illustrate the theme of the paper. Authors may also provide appropriate text, not exceeding 50 words.

The content of the graphical abstract will be typeset and should be kept within an area of 5 cm by 17 cm. Authors must supply the graphical abstract on disk as well as in printed form, or if using online submission include the graphical abstract in the main article file and then attach the graphic separately.

For examples of graphical abstracts, please consult a recent issue of the journal or visit the journal page on ScienceDirect at: <http://www.sciencedirect.com/science/journal/00404039> and click 'Sample Issue Online'.

Title: The title should be brief, specific and rich in informative words; it should not contain any literature references or compound numbers.

Authors and affiliations: Where possible, supply given names, middle initials and family names for complete identification. Use superscript lowercase letters to indicate different addresses, which should be as detailed as possible, and must include the country name. The corresponding author should be indicated with an asterisk, and contact details (fax, e-mail) should be placed in a footnote. There should be only one corresponding author. Information relating to other authors (e.g. present addresses) should be placed in footnotes indicated by the appropriate symbols (see below).

Abstract: Authors must include a short abstract that states briefly the purpose of the research, the principal results and major conclusions. References and compound numbers should not be mentioned in the abstract unless full details are given.

Text: Text should be subdivided in the simplest possible way consistent with clarity. Headings should reflect the relative importance of the sections. Ensure that all tables, figures and schemes are cited in the text in numerical order. The preferred position for chemical structures should be indicated. Trade names should have an initial capital letter, and trademark protection should be acknowledged in the standard fashion, using the superscripted characters TM and [®] for trademarks and registered trademarks respectively. All measurements and data should be given in SI units where possible, or other internationally accepted units. Abbreviations should be used consistently throughout the text, and all nonstandard abbreviations should be defined on first usage. Authors are requested to draw attention to hazardous materials or procedures by adding the word **CAUTION** followed by a brief descriptive phrase and literature references if appropriate. The experimental information should be as concise as possible, while containing all the information necessary to guarantee reproducibility.

References: In the text, references should be indicated by superscript Arabic numerals which run consecutively through the paper and appear after any punctuation; ensure that all references are cited in the text and vice versa. The reference list should preferably contain only literature references; other information (e.g. experimental details) should be placed either within the body of the text, or as a footnote to the text. Preferably, each reference should contain only one literature citation. Authors are expected to check the original source reference for accuracy. Journal¹

titles should be abbreviated according to American Chemical Society guidelines (*The ACS Style Guide*; Dodd, J. S., Ed.; American Chemical Society: Washington, DC, 1997). Inclusive pagination is strongly recommended. Book references^{2,3} should cite author(s), chapter title (if applicable), editor(s), book title, edition/volume, publisher name, publisher location, date and pages. Examples, including a thesis citation,⁴ are shown below.

1. Barton, D. H. R.; Yadav-Bhatnagar, N.; Finet, J.-P.; Khamisi, J. *Tetrahedron Lett.* **1987**, *28*, 3111–3114.
2. Katritzky, A. R. *Handbook of Organic Chemistry*; Pergamon Press: Oxford, 1985; pp 53–86.
3. Smith, D. H.; Masinter, L. M.; Sridharan, N. S. In *Heuristic DENDRAL: Analysis of Molecular Structure*; Wipke, W. T., Heller, S. R., Feldmann, R. J., Hyde, E., Eds. Computer representation and manipulation of chemical information. John Wiley: New York, 1974; pp 287–298.
4. Cato, S. J. Ph.D. Thesis, University of Florida, 1987.

Footnotes: Footnotes should appear at the bottom of the appropriate page and be indicated by the following symbols:

^{*}, [†], [‡], [§], [¶], ^{||}.

Tables

All tables should be cited in the text, and numbered in order of appearance with Arabic numerals. All table columns should have a brief explanatory heading and where appropriate, units of measurement. *Vertical lines should not be used.* Footnotes to tables should be typed below the table, each on a separate line, and should be referred to by superscript letters.

Artwork

Figures, schemes and equations must be cited in the text and numbered in order of appearance with Arabic numerals; other graphics should be placed at a particular position in the text but not specifically referenced. All graphics (including chemical structures) must be supplied camera-ready. Please ensure that all illustrations within a paper are consistent in type and quality. Captions should not be included as part of the graphic; instead all captions should be supplied at the end of the text. All graphics must be labelled with the figure or scheme number, and the corresponding author's name.

If graphics are created using ChemDraw, the preferred settings are: font 10 pt Helvetica, chain angle 120°, bond spacing 18% of length, fixed length 14.4 pt (0.508 cm), bold width 2.0 pt (0.071 cm), line width 0.6 pt (0.021 cm), margin width 1.6 pt (0.056 cm), and hash spacing 2.5 pt (0.088 cm). Compound numbers should be in bold face.

Computer-generated illustrations, halftones and line/tones should also be provided where possible. The following points should be taken into consideration when preparing electronic graphic files: Tagged Image File Format (TIFF) or Encapsulated PostScript (EPS) files are preferred. Suggested packages for line graphics are ChemDraw, Adobe Illustrator (version 3.0 or above), Freehand and Corel Draw. Graphics created in WordPerfect and Word generally have a too low resolution for our requirements. Files of scanned line graphics can be accepted at a minimum resolution of 1000 dpi, for scanned halftones, 300 dpi, and scanned line/tones, 500 dpi. Colour should be scanned at 300 dpi (500 dpi for colour line/tones).

For detailed instructions on the preparation of electronic artwork, consult Elsevier's Author Gateway at <http://authors.elsevier.com>

Colour: Colour figures may be printed in the journal at no charge to the author, provided that the Editor considers the colour necessary to convey scientific information. Colour figures should be supplied in electronic format as JPEG files (minimum 300 dots per inch) and if possible also in hard copy format.

Colour figures should be clearly marked as being intended for colour reproduction on the Web and in print or to be reproduced in colour on the Web and in black-and-white in print.

If only colour on the web is required, black-and-white versions of the figures should also be supplied for printing purposes.

Copyright guidelines

Upon acceptance of an article, Authors will be asked to transfer copyright (for more information on copyright see <http://authors.elsevier.com>). This transfer will ensure the widest possible dissemination of information. A letter will be sent to the corresponding Author confirming receipt of the manuscript. A form facilitating transfer of copyright will be provided.

If excerpts from other copyrighted works are included, the Author(s) must obtain written permission from the copyright owners and credit the source(s) in the article. Elsevier has preprinted forms for use by Authors in these cases: contact Elsevier's Rights Department, Oxford, UK; phone: (+44) 1865 843830; fax: (+44) 1865 853333; e-mail: permissions@elsevier.com. Requests may also be completed on-line via the Elsevier homepage (<http://www.elsevier.com/locate/permissions>).

Online submission of manuscripts

Tetrahedron manuscripts can be submitted using the TetSubmit online submission and review environment. Authors are required to go to the website and upload their article and its associated artwork. Authors are asked to ensure that their files only have one file extension (e.g., .doc). A PDF file is generated and the reviewing process is carried out using the PDF. All correspondence between editor and author is performed by e-mail. Authors are, however, legally obliged to sign and return a physical transfer of copyright form by conventional mail.

To submit your paper online, please go to: <http://www.tetsubmit.com>

Templates are provided in order to allow authors to view their paper in a style close to the final printed form. Their use is optional. All manuscripts will be fully typeset from the author's electronic files. It should be noted that due to defined typesetting standards and the complex requirements of electronic publishing, the Publisher will not always be able to exactly match the layout the author has submitted. In particular, in the finished journal article, figures and tables are usually placed at the top or bottom of pages. The template is only intended to be used in assisting with the preparation and submission of manuscripts.

It should be noted that the use of the journal template is not a requirement and its adoption will neither speed nor delay publication. Elsevier can handle most major word processing packages and in general most formatting applied by authors for style and layout is replaced when the article is being typeset.

These templates contain a large number of macros. To ensure successful PDF conversion in TetSubmit, it is important that the author saves a new document based on the template, rather than saving the template itself. To use the template, the author should save the final document as a Word file with a '.doc' extension (rather than the '.dot' extension).

Please ensure that the graphical abstract is included as page 1 of your manuscript when submitting online.

For detailed instructions on the preparation of electronic artwork, consult Elsevier's Author Gateway at <http://authors.elsevier.com>

Mail submission of manuscripts

The original and three copies of the manuscript, including the graphical abstract should be sent to the appropriate editorial office (see below). Authors must also include a brief statement justifying acceptance. To achieve rapid publication authors are encouraged to fax or preferably e-mail their first submission to the Editor at the time that they mail the manuscript; the date of submission will be taken as the date of e-mail. The corresponding author's full mailing address, plus phone and fax numbers and e-mail address should be supplied to aid rapid communication. Papers sent to the wrong Regional Editor will be forwarded (causing delay) to the appropriate Editor as determined by the *permanent address* of the corresponding author.

Disk submission: When a manuscript has been accepted for publication by the editorial office, authors are requested to also supply their paper (and graphical abstract) in electronic format on disk. Please give full details of operating system, programs used, number of files sent, and information contained in each file. It is important that the file on disk and the accepted printout are identical.

Text: We can accept most word-processing formats (but prefer Microsoft Word: IBM or Macintosh). Most formatting codes will be removed or replaced on processing your article so there is no need for you to use excessive layout styling. In addition, do not use options such as automatic word breaking, justified layout, double columns, automatic paragraph numbering (especially for numbered references) or EndNote. However, do use bold face, italic, subscripts, superscripts, etc. Do not embed the figures into the text file.

Graphics: Since we cannot guarantee the usability of graphic files, hard copies of all illustrations must accompany the accepted printout of the manuscript in all cases.

Editorial offices

- (1) Contributions from Austria, Belgium, France, Germany, Italy, Portugal, Spain and Switzerland,** Professor S. Z. Zard, Laboratoire de Synthèse Organique, Ecole Polytechnique, F-91128 Palaiseau Cedex, France. Fax: +33 (0)1 69 33 3057; e-mail: tetlet@polytechnique.fr
- (2) China,** Professor Lin Guo-Qiang, Shanghai Institute of Organic Chemistry, Chinese Academy of Sciences, 354 Fenglin Road, Shanghai 200032, China (manuscripts from Taiwan may be sent to Professor Lin, or to the usual Editor in Japan, at the choice of the authors). Fax: +86 21 641 66263; e-mail: tetrahed@pub.sioc.ac.cn
- (3) Japan and South Korea,** Professor Y. Yamamoto, Department of Chemistry, Graduate School of Science, Tohoku University, Sendai 980-8578, Japan. Fax: +81 22 217 6784; e-mail: tetlet@mail.tains.tohoku.ac.jp
- (4) The Americas, Asymmetric and Combinatorial Synthesis, Heterocycles, Organometallic Chemistry, Physical Organic Chemistry, Radicals, Small Rings, Strained Systems, Theory and Total Synthesis,** Professor J. Wood, Department of Chemistry, Yale University, PO Box 208107, New Haven, CT 06520-8107, USA. Fax: +1 203 432 0796 [866 255 5210 toll free in USA/ Canada]; e-mail: tetlett@yale.edu
- (5) The Americas, General Synthetic and Combinatorial Methods, Bioorganic Chemistry, Heterocycles, Natural Products, Carbohydrates and Photochemistry,** Professor B. Ganem, Department of Chemistry and Chemical Biology, Cornell University, Ithaca, NY 14853-1301, USA. Fax: +1 607 255 8422; e-mail: tetlett@cornell.edu
- (6) All regions other than those specified under (1)–(5) above,** Professor E. J. Thomas, School of Chemistry, The University of Manchester, Oxford Road, Manchester, M13 9PL, UK. Fax: +44 161 275 4622; e-mail: tetlet@man.ac.uk

Proofs

Proofs will be despatched via e-mail or fax and should be returned to the publisher with corrections as quickly as possible, normally within 48 hours of receipt.

Offprints

The corresponding author will be sent 25 free offprints and a complimentary copy of the journal issue. Additional offprints can be ordered when the paper is accepted. Correspondence regarding offprints should be directed to: Global Author Support, Elsevier Ireland Ltd, Elsevier House, Brookvale Plaza, East Park, Shannon, Co. Clare, Ireland; e-mail: authorsupport@elsevier.com

Page charges

None.

Authors benefits

Contributors to Elsevier Journals are entitled to a 30% discount on all Elsevier books.

Other enquiries

Visit Elsevier's Author Gateway (<http://authors.elsevier.com>) for the facility to track accepted articles and set up e-mail alerts

to inform you of when an article's status has changed. The Author Gateway also provides detailed artwork guidelines, copyright information frequently asked questions and more.

Contact details for questions arising after acceptance of an article, especially those relating to proofs, are provided after registration of an article for publication.
