Available online 12 June 2006

The authors inadvertently overlooked the contribution by Edwards, D. R.; Crudden, C. M.; Yam, K. *Adv. Synth. Catal.* **2005**, *347*, 50–54, which describes the hydroboration of 4-octene with pinacol borane and the need to use oxidised Wilkinson’s catalyst. This paper should have been cited in our article. The authors apologise for this oversight.
