Available online 1 December 2006

---

The authors thank Dr. Mark Briggs (GE Healthcare) for informing them that cyanine-based amino acids derived from the cyanine dyes Cy 3.0 and Cy 5.0 have been already synthesized and published in the form of a patent application (Ref. 38). Thus, this reference should be taken into account in the last footnote section (p 8282) about the already published fluorescent amino acids monomers.
