The legend within Figure 3 should read ‘Dose ( $\mu\text{g}$ )’ instead of ‘Dose (mg)’. This has been updated in the figure shown below. The authors regret the error.

**Figure 3.** Mean catch  $\pm$  SE of male citrophilus mealybugs in red delta traps baited with various doses of racemic chrysanthemyl 2-acetoxy-3-methylbutanoate **3** (0.1, 1, 10, 100 and 1000  $\mu\text{g}$ ) loaded on red rubber septa. Letters on columns indicate significant differences (FPLS test,  $P < 0.05$ ).
