Corrigendum

Corrigendum to “Water complexes with organic solvents in liquid phase. An IR spectroscopic study” [Tetrahedron Lett. 51 (2010) 2610–2612]

I. I. Greenwald, I. Yu. Kalagaev*

Department of Chemistry, Nizhnii Novgorod State Technical University, Minin st., Nizhnii Novgorod 603950, Russia

The author regrets that when this manuscript was published, the sixth paragraph on page 1 contained incorrect frequencies. Please find the corrected paragraph as follows:

Similar IR bands were found for acetonitrile: the bands at 3002 and 2943 cm^{-1} have isotopic shifts, but the bands at 3165 and 2626 cm^{-1} are not sensitive to H/D substitution. The spectral picture remains unchanged after distillation of acetonitrile.¹¹
