

## ERRATA

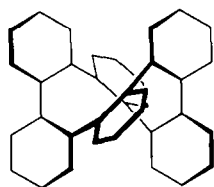

MARIO FARINA and CARLO MORANDI: High symmetry chiral molecules, *Tetrahedron* **30**, 1819 (1974).

P. 1824:

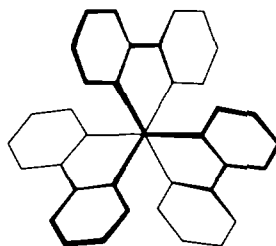

The absolute configuration of twistane **25a** has been corrected in respect of the original attribution (M. Tichý, *Tetrahedron Letters* 2001 (1972)). J. H. Brewster, applying his new Helical Conductor Model (*Tetrahedron Letters* 4355 (1972)) calculated positive rotation for (M)-twistane.

P. 1830:

We report formulas **52** and **53** that are lacking in the note added in proof.

**52**

**53**
