

ERRATUM

ALBERT W. BURGSTAHLER, DALE L. BOGER and NANDKISHOR C. NAIK, Synthesis and chiroptical properties of some asymmetric planar dienes. *Tetrahedron* **32**, 309 (1976).

In a report we had overlooked, J.-C. Beloeil and M. Fetizon [*C. R. Hebd. Seances Acad. Ser. C* **279**, 347 (1974)] described essentially the same route to 5 α -androsta-14,16-diene (2) as in our paper. They also obtained this diene crystalline, m.p. 35-36°, but their recorded λ_{\max} of 225 nm is a misprint for 255 nm (letter of 20 June 1976, from Dr. Beloeil to A. W. B.), a value close to that found in several of our original determinations.
