

ERRATA

R. LOHRMANN and L. E. ORGEL: Preferential formation of (2'-5')-linked internucleotide bonds in non-enzymatic reactions. *Tetrahedron* **34**, 853-855 (1978).

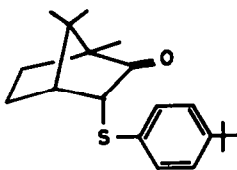

Page 854:

The first paragraph under Preparations should begin:

ImpU. The anhydrous triethylammonium salt of pU (0.45 mmol) was dissolved in an anhydrous mixture containing imidazole (4.5 mmol), triethylamine (0.90 ml) . . .

FRANCES C. BROWN, DAVID G. MORRIS and A. MALCOLM MURRAY: Influence of substituents on carbonyl carbon chemical shifts in 4-substituted bornane-2,3-diones and the preparation of bornane-2,3-dione. *Tetrahedron* **34**, 1845-1845, 3240 (1978).

Structure 7 should appear as follows:

7
