

ERRATUM AND NOTE TO AUTHORS

The name "Exaltolide" was used as a generic chemical term in a paper published in *Tetrahedron Letters* 252 (1983).

"Exaltolide" is an important trade mark registered all over the world by Firmenich SA, Geneva, Switzerland.

As chemical designations are excluded from trade mark protection, the Editors of *Tetrahedron* and *Tetrahedron Letters* will take this into consideration when accepting papers for publication.

Authors must ensure that any name or term with a registered trade mark and used in an article will have the indication ®. In addition the company in whose name the trade mark is registered will be acknowledged.

Pergamon Press apologise to the Management of Firmenich for the oversight.
