

## ERRATUM

A. T. BALABAN, M. D. GHEORGHIU, I. C. SHCHERBAKOVA, E. V. KUZNETSOV and I. A. YUDILEVICH, 2-Benzopyrylium salts—XXXI. Analogs of Reissert compounds from 2-benzopyrylium salts and sodium cyanide, *Tetrahedron* **43**, 409 (1987).

The footnote is marked with an asterisk after the only text's mention of the reference [14]:  
. . . and the only example of 1-cyano-1-*N-R*-amidoisochromenes [14].\*

---

\*Nevertheless the sharp CN stretching band at  $2230\text{ cm}^{-1}$  can be discovered in cyanoisochromenes II a-h after an accumulation and a scanning of a signal on a Shimadzu IR instrument as will be described in a following paper.
