

CORRIGENDUM

Some Novel Aspects of Regioselectivity in 1,3 Dipolar
Cycloadditions of 4H-1-Benzopyran-4-thione

by J.S. Sandhu, A.K. Baruah and D. Prajapati

Tetrahedron, Vol. 44, No. 19, pp. 6137 to 6142, 1988

Since the work described in this paper was completed, X-ray crystallography (A.D. Redhouse, University of Salford) has shown that the adduct of thiochromone and nitrilimine (3c) has structure (A), arising from cycloaddition to the thiocarbonyl group rather than to the carbon-carbon double bond.
