On p. 3716, Scheme I, the ylide employed was $\text{Ph}_3\text{P}=\text{CBrCO}_2\text{Me}$ instead of $\text{Ph}_3\text{P}=\text{CHCO}_2\text{Me}$.

In the text of p. 3721, in the place of **7R,S** (twice), should be **8R,S**.

Leo A. Paquette and Jeffrey A. Oplinger, Limitations in the application of anionic oxy-Cope sigmatropy to elaboration of the forskolin nucleus, *Tetrahedron* **1989**, *45*, 107.

p. 118, lines 25–27: The mass spectral and analytical data listed for **20** are actually those of **14** (see earlier in text). The correct data are: MS m/z (M^+) calcd 278.1882, obsd 278.1876.

Anal. Calcd for $\text{C}_{17}\text{H}_{26}\text{O}_3$: C, 73.34; H, 9.41. Found: C, 73.14; H, 9.36.
