

CORRIGENDUM

Ajoy K Banerjee, Julio C Acevedo, Rosana González and Anibal Rojas, Acid induced rearrangement of β,γ -unsaturated ketones, *Tetrahedron* **1991**, *47*, 2081–2086

The authors regret that the discussion in their article did not mention explicitly the extensive studies of the acid-catalyzed rearrangement of unsaturated ketones to aromatic hydrocarbons by Ourisson *et al*, termed by them the "*enone-benzene rearrangement*" these publications are accessible through our ref 3 to one of their series of papers The mechanism proposed by Ourisson *et al* is the one we used to explain the structure of our products Finally, our discussion seems to imply an error made by these authors in the rearrangement of our ketone 1, which they had in fact not studied
