

CORRIGENDUM

Kurt Eger, Mohammad Jalalian and Mathias Schmidt, Synthesis of a potential antiviral compound: 5-bromoethynyl-2'-deoxyuridine, *Tetrahedron* **1994**, *50*, 8371–8380.

1. The authors wish to thank Dr. Tai-Shun Lin (New Haven, Connecticut, USA) for a hint regarding the stereochemistry of the formulae presented in their paper. The formulae represent the L-configuration instead of the synthesized D-isomers. The formulae giving the correct stereochemistry are shown below.

2. Although identical, structures **2** and β -**8** erroneously were given different numbers.

No.	R=
7	p-chlorobenzoyl
2 = β -8	H
