## The Tetrahedron Chair in Organic Synthesis 2002

The Tetrahedron Chair in Organic Synthesis 2002 was awarded to Professor Hisashi Yamamoto at the Ninth Belgian Organic Synthesis Symposium (BOSS-9) in Namur, Belgium, on Monday 8 July 2002. Professor Yamamoto, formerly of Nagoya University, has just started in a new position at the University of Chicago.

Professor Yamamoto (above) presenting a one-day course as Tetrahedron Chair at BOSS-9.

The lectures were entitled 'Lewis Acid Catalysis: towards more selective, more reactive and more versatile systems'.

Professor Yamamoto being presented with the award of A7000 and a certificate by Dr James Milne, Publisher for Organic and Inorganic Chemistry at Elsevier Science.
