### The use of arynes in organic synthesis

Tetrahedron 59 (2003) 701

Hélène Pellissier\* and Maurice Santelli

Laboratoire de Synthèse Organique UMR no. 6009, Faculté des Sciences de Saint-Jérôme, Avenue Esc. Normandie-Niemen, 13397 Marseille, Cedex 20, France

This review is an update of aryne chemistry and covers the literature from 1990 to 2002. Unlike its predecessor, this review includes the transition metal-catalyzed reactions of arynes. The importance of arynes for the synthesis of natural products particularly alkaloids is well illustrated.

### New spirocyclic sesquiterpenes from the marine sponge

Mitsunori Oda,\* Kazuya Okawa, Hitoshi Tsuri and Shigeyasu Kuroda

Department of Applied Chemistry, Faculty of Engineering, Toyama University, Gofuku 3190, Toyama 930-8555, Japan

By NMR spectroscopy the title alcohol was detected as a transient intermediate in the reaction between the tropylium cation and sodium deuteoxide in D<sub>2</sub>O leading to ditropylether, and was also detected in acid-catalyzed disproportionation of ditropylether.

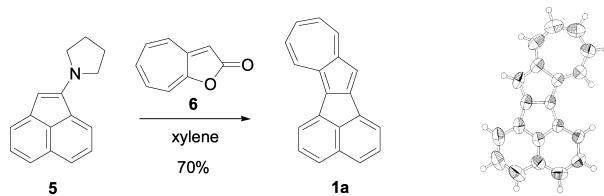

## Synthesis, molecular structure, and chemical reactivity of azuleno[1,2-*a*]acenaphthylene

Tetrahedron 59 (2003) 801

Stereoselective syntheses of (-)-malyngolide (-)-1, (+)-malyngolide (+)-1 and (+)-tanikolide (+)-2 are described. Key steps in each of these syntheses were stereoselective additions of organometallic reagents to  $\alpha$ -oxygenated ketones and olefin ring-closing metatheses.
