

Erratum

In the November 1999 issue of the *Journal*, in the article titled “ γ -Crystallins and Human Cataracts: A Puzzle Made Clearer” (65:1261–1267), by Héon et al., figures 2 and 3 had incorrect legends: the two sequence chromatograms and the three pedigrees in figure 2 refer to CRYGD and are described by the legend erroneously

attached to figure 3; conversely, the single sequence chromatogram and the restriction-enzyme–digestion profile in figure 3 refer to CRYGC and are described by the legend erroneously attached to figure 2. The *Journal* regrets these errors.
