

*Erratum***Two-species Coulomb chains for quantum information**

G. Morigi and H. Walther

Max Planck Institute für Quantenoptik, Haus-Kopfermann-Strasse 1, Postfach 1327, 85748 Garching, Germany

Eur. Phys. J. D 13, 261–269 (2001)

Due to an error in reading the data, the lines in Figure 4 do not connect correctly the data-points. Figure 4 should be replaced with the following one.

**Fig. 4.** Cooling rate  $W_\alpha$  vs. all the possible configurations of a  $N = 3$  ionic sequence made up of indium (black circles) and/or magnesium (white circles) ions, where  $W_\alpha$  has been rescaled by the value of  $W_\alpha^{\max}$  for a chain of magnesium ions. Solid line: eigenmode  $\Omega_1$ ; dashed line: eigenmode  $\Omega_2$ ; grey line: eigenmode  $\Omega_3$  (*cf.* Fig. 3).

None of the discussions and conclusions of the paper are affected.
