Eur. Phys. J. D **17**, 153–165 (2001)

There is a misprint in equation (3.6b), the correct form of equation (3.6b) being

$$D_n = \frac{nV_0^2}{\tilde{I}' + (2n - 1)\nu + nV_0^2/(\tilde{I} + 2n\nu + D_{n+1})}. \quad (3.6b)$$

The afore-mentioned misprint has no effect on the other results of the paper. In particular, the numerical calculations based on the continued fraction (3.6) were performed with the help of the correct formula above.
