International Symposium on Non-Linear Deformation, Fracture and Fatigue of Polymeric Materials

sponsored by:
Division of Polymeric Materials: Science and Engineering,
Division of Polymer Chemistry,
American Chemical Society

September 8-13, 1985
ACS National Meeting, Chicago

The emphasis of this symposium will be on characterization and modeling of non-linear deformation behavior and prediction of failure in polymeric systems. These systems include plastics in structural applications, polymeric matrix materials in advanced composites, and structural adhesive joints. Papers are solicited which use materials science, molecular modeling and continuum mechanics approaches to solve these problems. Abstracts are due April 1, 1985. For abstract forms and further information, contact:
