

MOLECULAR BIOLOGY**Structure and Function of Genes and Other Genetic Materials**

- Human *MUC4* Mucin cDNA and Its Variants in Pancreatic Carcinoma A. Choudhury, N. Moniaux, J.P. Winpenny, M.A. Hollingsworth, J.-P. Aubert, and S.K. Batra 233

- Molecular Cloning and Characterization of a Unique 60 kDa/72 kDa Antigen Gene Encoding Enzyme I of the Phosphoenolpyruvate: Sugar Phosphotransferase System (PTS) of *Mycoplasma hyopneumoniae* T.-L. Chung, L. Farh, Y.-L. Chen, and D. Shiuan 261

Transcription

- Analyses of Virus-Induced Homomeric and Heteromeric Protein Associations between IRF-3 and Coactivator CBP/p300 W. Suhara, M. Yoneyama, T. Iwamura, S. Yoshimura, K. Tamura, H. Namiki, S. Aimoto, and T. Fujita 301

Translation

- Studies on ATPase(GTPase) Intrinsic to *E. coli* Ribosomes (1) K. Ogata, R. Ohno, R. Morishita, Y. Endo, and A. Wada 309

Molecular Genetics

- Overexpression of Salicylate Hydroxylase and the Crucial Role of Lys¹⁶³ as Its NADH Binding Site K. Suzuki, E. Asao, Y. Nakamura, M. Nakamura, K. Ohnishi, and S. Fukuda 293

CELL**Cell General**

- Intracellular Degradation of Histidine-Rich Glycoprotein Mutants: Tokushima-1 and 2 Mutants Are Degraded by Different Proteolytic Systems S. Wakabayashi, H. Yoshida, T. Shigeikiyo, and T. Koide 201

- Dual Pathways for the Secretion of Lysosomal Cholesterol into a Medium from Cultured Macrophages M. Ikemoto, T. Furuchi, H. Arai, and K. Inoue 251

- Maintenance-Type DNA Methyltransferase Is Highly Expressed in Post-Mitotic Neurons and Localized in the Cytoplasmic Compartment K. Inano, I. Suetake, T. Ueda, Y. Miyake, M. Nakamura, M. Okada, and S. Tajima 315

Receptors and Signal Transduction

- Store Depletion by Caffeine/Ryanodine Activates Capacitative Ca²⁺ Entry in Nonexcitable A549 Cells H.-H. Xue, D.-M. Zhao, T. Suda, C. Uchida, T. Oda, K. Chida, A. Ichiyama, and H. Nakamura 329

BIOTECHNOLOGY**Gene and Protein Engineering**

- Stabilization of Human RNase 1 by Introduction of a Disulfide Bond between Residues 4 and 118 J. Futami, H. Tada, M. Seno, S. Ishikami, and H. Yamada 245

CONTENTS Rearranged According to Subject Categories, Vol. 128, No. 2

JB REVIEW

- Porphyromonas gingivalis* Proteinases as Virulence Determinants in Progression of Periodontal Diseases T. Kadowaki, K. Nakayama, K. Okamoto, N. Abe, A. Baba, Y. Shi, D.B. Ratnayake, and K. Yamamoto 153

BIOCHEMISTRY

Biomolecular Structures

- NMR Studies of Model Peptides of PHGGGWGQ Repeats within the N-Terminus of Prion Proteins: A Loop Conformation with Histidine and Tryptophan in Close Proximity H. Yoshida, N. Matsushima, Y. Kumaki, M. Nakata, and K. Hikichi 271

- Structural Study of the N-Terminal Domain of the Alpha Subunit of *Escherichia coli* RNA Polymerase Sulubilized with Non-Denaturing Detergents T. Otomo, T. Yamazaki, K. Murakami, A. Ishihama, and Y. Kyogoku 337

Glycobiology and Carbohydrate Biochemistry

- Structural Analysis of N-Linked Sugar Chains of Human Blood Clotting Factor IX Y. Makino, K. Omichi, N. Kuraya, H. Ogawa, H. Nishimura, S. Iwanaga, and S. Hase 175

- Studies on the Structure-Function Relationship of the HNK-1 Associated Glucuronyltransferase, GlcAT-P, by Computer Modeling and Site-Directed Mutagenesis K. Ohtsubo, S. Imajo, M. Ishiguro, T. Nakatani, S. Oka, and T. Kawasaki 283

Protein and Peptide Chemistry

- Primary Structure and Autoproteolysis of Brevilysin H6 from the Venom of *Glycydium halys brevicaudus* S. Fujimura, K. Oshikawa, S. Terada, and E. Kimoto 167

- Edge-to-Face CH/ π Interaction between Ligand Phe-Phenyl and Receptor Aromatic Group in the Thrombin Receptor Activation A. Matsushima, T. Fujita, T. Nose, and Y. Shimohigashi 225

Enzymology

- The Steady-State Kinetics of the Enzyme Reaction Tested by Site-Directed Mutagenesis of Hydrophobic Residues (Val, Leu, and Cys) in the C-Terminal α -Helix of Human Adenylate Kinase T. Ayabe, S.K. Park, H. Takenaka, O. Takenaka, H. Maruyama, M. Sumida, T. Onitsuka, and M. Hamada 181

- Glutamate 83 Is Important for Stabilization of Domain-Domain Conformation of *Thermus aquaticus* Glycerol Kinase H.-S. Huang, K. Ito, T. Kabashima, and T. Yoshimoto 207

- Purification and Characterization of a Novel Heparinase from *Bacteroides stercoris* HJ-15 B.-T. Kim, W.-S. Kim, Y.S. Kim, R.J. Linhardt, and D.-H. Kim 323

Biochemistry of Proteolysis

- Molecular Cloning and Functional Expression of cDNA Encoding the Cysteine Proteinase Inhibitor with Three Cystatin Domains from Sunflower Seeds Y. Kouzuma, H. Inanaga, K. Doi-Kawano, N. Yamasaki, and M. Kimura 161

Biological Oxidation and Bioenergetics

- Unique Heme Environment at the Putative Distal Region of Hydrogen Peroxide-Dependent Fatty Acid α -Hydroxylase from *Sphingomonas paucimobilis* (Peroxygenase P450_{SP6}) Y. Imai, I. Matsunaga, E. Kusunose, and K. Ichihara 189

- Substrate Recognition and Activation Mechanism of D-Amino Acid Oxidase: A Study Using Substrate Analogs Y. Nishina, K. Sato, R. Miura, and K. Shiga 213

Biochemistry in Cell Membranes

- Molecular Construction of a Multidrug Exporter System, AcrAB: Molecular Interaction between AcrA and AcrB, and Cleavage of the N-Terminal Signal Sequence of AcrA T. Kawabe, E. Fujihira, and A. Yamaguchi 195
