

CORRECTIONS

Vol. 130, No. 1 (2001)

In the paper “Crystallographic Studies on Damaged DNAs: III. *N*⁴-Methoxycytosine Can Form Both Watson-Crick Type and Wobbled Base Pairs in a *B*-Form Duplex” by M. Tofazzal Hossain *et al.* (pp. 9–12), units of the *y*-axis labels of Fig. 1b on page 11 were not printed. The labels are from the top to the bottom: “rise (Å),” “displacement (Å),” and “pseudorotation phase angle (°).”

Vol. 130, No. 4 (2001)

In the paper “A Novel Human Metalloprotease Synthesized in the Liver and Secreted into the Blood: Possibly, the von Willibrand Factor–Cleaving Protease?” by Kenji Soejima *et al.* (pp. 475–480), the authors rechecked the raw DNA sequencing data and found that position 3347 in Fig. 4A on page 478 was actually “G.” Therefore, positions 3346, 3347, and 3348 were not “AAA” representing Lys(K), but “AGA” representing Arg(R).
