

CELL

Extracellular Matrices and Cell Adhesion Molecules

- Endostatin Inhibits Adhesion of Endothelial Cells on Collagen I *via* $\alpha_2\beta_1$ Integrin, a Possible Cause of Prevention on Chondrosarcoma Growth T Furumatsu, N Yamaguchi, K. Nishida, A. Kawai, T. Kunisada, M. Namba, H. Inoue, and Y. Ninomiya 619

Receptors and Signal Transduction

- Macrophage Binding and the Uptake of Oxidized Low Density Lipoprotein Are Regulated by Intracellular Protein Phosphorylation M. Beppu, K. Ohishi, M. Kasahara, K. Kizaki, Y. Inohana, and K. Kikugawa 547

Stress Proteins and Molecular Chaperones

- Inhibition of Proteasomes Induces Accumulation, Phosphorylation, and Recruitment of HSP27 and α B-Crystallin to Aggresomes H. Ito, K. Kamei, I. Iwamoto, Y. Inaguma, R. Garcia-Mata, E. Sztul, and K. Kato 593

BIOTECHNOLOGY

Biomaterials

- Characteristics of Bovine Hemoglobin as a Potential Source of Hemoglobin-Vesicles for an Artificial Oxygen Carrier H. Sakai, Y. Masada, S. Takeoka, and E. Tsuchida 611

627

CORRECTIONS

CONTENTS Rearranged According to Subject Categories, Vol. 131, No. 4

JB MINIREVIEWS—Lipid Signaling

- Phosphoinositide 3-Kinases in Immunity: Lessons from Knockout Mice T. Sasaki, A. Suzuki, J. Sasaki, and J.M. Penninger 495
- Phosphoinositide Kinases as Enzymes that Produce Versatile Signaling Lipids, Phosphoinositides Y. Kanaho and T. Suzuki 503

BIOCHEMISTRY

Biochemistry Général

- Additivity of Interactions of Zinc Finger Motifs in Specific Recognition of RNA M. Giel-Pietraszuk and M.Z. Barciszewska 571

Nucleic Acid and Peptide Biochemistry

- The Possibility of Reducing Xenoantigen Levels by a Novel Gal 3'-Sulfotransferase (GP3ST) M. Koma, S. Miyagawa, K. Honke, R. Nakai, S. Miyoshi, M. Ohta, H. Matsuda, R. Shirakura, and N. Taniguchi 517

Glycobiology and Carbohydrate Biochemistry

- N*-Glycans Stabilize Human Erythropoietin through Hydrophobic Interactions with the Hydrophobic Protein Surface: Studies by Surface Plasmon Resonance Analysis *Rapid Communication* T. Toyoda, T. Arakawa, and H. Yamaguchi 511

Enzymology

- Comparative Study on the Reaction Mechanism of Family 18 Chitinases from Plants and Microbes C. Sasaki, A. Yokoyama, Y. Itoh, M. Hashimoto, T. Watanabe, and T. Fukamizo 557
- Catalytic Mechanism of β -Amylase from *Bacillus cereus* var. *mycoides*: Chemical Rescue of Hydrolytic Activity for a Catalytic Site Mutant (Glu367→Ala) by Azide H. Miyake, C. Otsuka, S. Nishimura, and Y. Nitta 587

Biochemistry of Proteolysis

- Identification of a Domain Conferring Nucleotide Binding to the *N*-Acetyl-D-Glucosamine 2-Epimerase (Renin Binding Protein) S. Takahashi, H. Ogasawara, K. Takahashi, K. Hori, K. Saito, and K. Mori 605

Metabolism and Bioenergetics

- Nitrate Reductase-Formate Dehydrogenase Couple Involved in the Fungal Denitrification by *Fusarium oxysporum* H. Uchimura, H. Enjoji, T. Seki, A. Taguchi, N. Takaya, and H. Shoun 579

Reactive Oxygen and Nitrogen Species

- Paraquat- and Diquat-Induced Oxygen Radical Generation and Lipid Peroxidation in Rat Brain Microsomes K. Yumino, I. Kawakami, M. Tamura, T. Hayashi, and M. Nakamura 565

Analytical Biochemistry

- Accurate Measurement of Near-Micromolar Oxygen Concentrations in Aqueous Solutions Based on Enzymatic Extradiol Cleavage of 4-Chlorocatechol: Applications to Improved Low-Oxygen Experimental Systems and Quantitative Assessment of Back Diffusion of Oxygen from the Atmosphere H. Nakajima, T. Ishida, H. Tanaka, and K. Horike 523

MOLECULAR BIOLOGY

Replication and Recombination

- Acidic Phospholipids with Unsaturated Fatty Acids Inhibit the Binding of Origin Recognition Complex to Origin DNA J.-R. Lee, H. Takenaka, N. Takahashi, M. Makise, Y. Yamaguchi, T. Tsuchiya, and T. Mizushima 541

Gene Expression

- PU.1 Is Dominant and HAF-1 Supplementary for Activation of the gp91^{phox} Promoter in Human Monocytic PLB-985 Cells Md.R. Islam, C. Fan, Y. Fujii, L.J. Hao, S. Suzuki, A. Kumatori, D. Yang, E. Rusvai, N. Suzuki, H. Kikuchi, and M. Nakamura 533
