Vol. 133, No. 6 (2003)

In Vol. 133, No. 6, received and accepted dates were missing from the title page of the following six articles. These dates are provided below.

pp. 719–724

S. Yamagishi *et al.*: Apoptosis-Signal Regulating Kinase-1 Is Involved in the Low Potassium-Induced Activation of p38 Mitogen-Activated Protein Kinase and c-Jun in Cultured Cerebellar Granule Neurons

(Received March 3, 2003; accepted March 12, 2003)

pp. 725–730

A.J. Nok and E.O. Balogun: A Bloodstream *Trypanosoma congolense* Sialidase Could Be Involved in Anemia during Experimental Trypanosomiasis

(Received December 4, 2002; accepted March 13, 2003)

pp. 731–736

M. Gozu *et al.*: Conformational Dynamics of β_2 -Microglobulin Analyzed by Reduction and Reoxidation of the Disulfide Bond

(Received February 12, 2003; accepted March 14, 2003)

pp. 737–744

I. Suetake *et al.*: Distinct Enzymatic Properties of Recombinant Mouse DNA Methyltransferases Dnmt3a and Dnmt3b

(Received February 26, 2003; accepted March 18, 2003)

pp. 745–756

K. Sudre *et al.*: Transcriptome Analysis of Two Bovine Muscles during Ontogenesis

(Received December 10, 2002; accepted March 19, 2003)

pp. 757–765

M. Caraglia *et al.*: The Eukaryotic Initiation Factor 5A Is Involved in the Regulation of Proliferation and Apoptosis Induced by Interferon- α and EGF in Human Cancer Cells

(Received February 15, 2003; accepted March 19, 2003)
