

## CONTENTS Vol. 139, No. 6

### JB Minireviews—Membrane Traffic in Physiology and Pathology

Overview: Membrane Traffic in Multicellular Systems: More than Just a Housekeeper	H. Ohno	941
Physiological Roles of Clathrin Adaptor AP Complexes: Lessons from Mutant Animals	H. Ohno	943
Trafficking of Alzheimer's Disease-Related Membrane Proteins and Its Participation in Disease Pathogenesis	T. Suzuki, Y. Araki, T. Yamamoto, and T. Nakaya	949

### Regular Papers

The Hemocyanin of the Shamefaced Crab <i>Calappa granulata</i> : Structural-Functional Characterization	A. Olianias, M.T. Sanna, I. Messana, M. Castagnola, D. Masia, B. Manconi, A. Cau, B. Giardina, and M. Pellegrini	957
Identification and Reverse Genetic Analysis of Mitochondrial Processing Peptidase and the Core Protein of the Cytochrome <i>bc<sub>1</sub></i> Complex of <i>Caenorhabditis elegans</i> , a Model Parasitic Nematode	H. Nomura, S.B.P. Athauda, H. Wada, Y. Maruyama, K. Takahashi, and H. Inoue	967
Superoxide Production in Human Neutrophils Is Enhanced by Treatment with Transmembrane Peptides Derived from Human Formyl Peptide Receptor	R. Hayashi, S. Osada, M. Yoshiki, D. Sugiyama, I. Fujita, Y. Hamasaki, and H. Kodama	981
Aggregation of Partially Unfolded Myosin Subfragment-1 into Spherical Oligomers with Amyloid-Like Dye-Binding Properties	H. Komatsu, N. Shinotani, Y. Kimori, J. Tokuoka, K. Kaseda, H. Nakagawa, and T. Kodama	989
Comparison of Starch Hydrolysis Activity and Thermal Stability of Two <i>Bacillus licheniformis</i> $\alpha$ -Amylases and Insights into Engineering $\alpha$ -Amylase Variants Active under Acidic Conditions	S. Lee, H. Oneda, M. Minoda, A. Tanaka, and K. Inouye	997
Comparison of the Wild-Type $\alpha$ -Amylase and Its Variant Enzymes in <i>Bacillus amyloliquefaciens</i> in Activity and Thermal Stability, and Insights into Engineering the Thermal Stability of <i>Bacillus</i> $\alpha$ -Amylase	S. Lee, Y. Mouri, M. Minoda, H. Oneda, and K. Inouye	1007
Engineering of the pH-Dependence of Thermolysin Activity as Examined by Site-Directed Mutagenesis of Asn112 Located at the Active Site of Thermolysin	M. Kusano, K. Yasukawa, Y. Hashida, and K. Inouye	1017
Molten Globule-Like State of Bovine Carbonic Anhydrase in the Presence of Acetonitrile	S. Safarian, M. Saffarzadeh, S.J. Zargar, and A.A. Moosavi-Movahedi	1025
A Retaining Endo- $\beta$ -Mannosidase from a Dicot Plant, Cabbage	T. Ishimizu, C. Hashimoto, R. Kajihara, and S. Hase	1035
Deletion Analysis of the Subunit Genes of V-Type Na <sup>+</sup> -ATPase from <i>Enterococcus hirae</i>	T. Hosaka, K. Takase, T. Murata, Y. Kakinuma, and I. Yamato	1045
Molecular Cloning of a Novel Type of Rat Cytoplasmic 17 $\beta$ -Hydroxysteroid Dehydrogenase Distinct from the Type 5 Isozyme	S. Ishikura, K. Matsumoto, M. Sanai, K. Horie, T. Matsunaga, K. Tajima, O. El-Kabbani, and A. Hara	1053
Effects of High Concentration of Salts on the Esterase Activity and Structure of a Kiwifruit Peptidase, Actinidain	K. Morimoto, E. Furuta, H. Hashimoto, and K. Inouye	1065

Biosynthesis of Archaeal Membrane Lipids: Digeranylgeranyl glycerophospholipid Reductase of the Thermoacidophilic Archaeon <i>Thermoplasma acidophilum</i>	Y. Nishimura and T. Eguchi	1073
Proinsulin C-Peptide Stimulates a PKC/I $\kappa$ B/NF- $\kappa$ B Signaling Pathway to Activate COX-2 Gene Transcription in Swiss 3T3 Fibroblasts	M. Kitazawa, Y. Shibata, S. Hashimoto, Y. Ohizumi, and T. Yamakuni	1083
