

## CONTENTS Vol. 140, No. 4

### Regular Papers

Active-Site Properties of <i>Phrixotrix</i> Railroad Worm Green and Red Bioluminescence-Eliciting Luciferases	V.R. Viviani, F.G.C. Arnoldi, B. Venkatesh, A.J.S. Neto, F.G.T. Ogawa, A.T.L. Oehlmeier, and Y. Ohmiya	467
A Novel Enzyme, $\lambda$ -Carrageenase, Isolated from a Deep-Sea Bacterium	Y. Ohta and Y. Hatada	475
The Antioxidant Role of a Reagent, 2',7'-Dichlorodihydrofluorescein Diacetate, Detecting Reactive-Oxygen Species and Blocking the Induction of Heme Oxygenase-1 and Preventing Cytotoxicity	Y. Andoh, A. Mizutani, T. Ohashi, S. Kojo, T. Ishii, Y. Adachi, S. Ikehara, and S. Taketani	483
Functional Difference of the SOX10 Mutant Proteins Responsible for the Phenotypic Variability in Auditory-Pigmentary Disorders	S. Yokoyama, K. Takeda, and S. Shibahara	491
Studies on the Acid Unfolded and Molten Globule States of Catalytically Active Stem Bromelain: A Comparison with Catalytically Inactive Form	B. Ahmad and R.H. Khan	501
Molecular Mechanisms of Improvement of Hydrolytic Antibody 6D9 by Site-Directed Mutagenesis	N. Takahashi-Ando, K. Shimazaki, H. Kakinuma, I. Fujii, and Y. Nishi	509
Raised Serum Chondroitin Sulfate Epitope Level in Ovarian Epithelial Cancer	P. Pothacharoen, S. Siriaunkgul, S. Ong-Chai, J. Supabandhu, P. Kumja, C. Wanaphirak, K. Sugahara, T. Hardingham, and P. Kongtawelert	517
Homologues of Radial Spoke Head Proteins Interact with $\text{Ca}^{2+}$ /Calmodulin in <i>Tetrahymena</i> Cilia	H. Ueno, Y. Iwataki, and O. Numata	525
Crystal Structure of TTHA0252 from <i>Thermus thermophilus</i> HB8, a RNA Degradation Protein of the Metallo- $\beta$ -lactamase Superfamily	H. Ishikawa, N. Nakagawa, S. Kuramitsu, and R. Masui	535
A Monte Carlo Sampling Method of Amino Acid Sequences Adaptable to Given Main-Chain Atoms in the Proteins	K. Ogata, K. Soejima, and J. Higo	543
Stimulation Effect of Dnmt3L on the DNA Methylation Activity of Dnmt3a2	I. Suetake, Y. Morimoto, T. Fuchikami, K. Abe, and S. Tajima	553
Characterization of Heme-Coordinating Histidyl Residues of Cytochrome $b_5$ Based on the Reactivity with Diethylpyrocarbonate: A Mechanism for the Opening of Axial Imidazole Rings	N. Nakanishi, F. Takeuchi, H. Okamoto, A. Tamura, H. Hori, and M. Tsubaki	561
Identification of the Positive Regulatory and Distinct Core Regions of Promoters, and Transcriptional Regulation in Three Types of Mouse Phospholipid Hydroperoxide Glutathione Peroxidase	H. Imai, M. Saito, N. Kirai, J. Hasegawa, K. Konishi, H. Hattori, M. Nishimura, S. Naito, and Y. Nakagawa	573
Probing Dynamics and Conformational Change of the GroEL-GroES Complex by $^{13}\text{C}$ NMR Spectroscopy	N. Nishida, F. Motojima, M. Idota, H. Fujikawa, M. Yoshida, I. Shimada, and K. Kato	591
New Evidence for ATP Binding Induced Catalytic Subunit Interactions in Pig Kidney Na/K-ATPase	K. Tanoue, S. Kaya, Y. Hayashi, K. Abe, T. Imagawa, K. Taniguchi, and K. Sakaguchi	599
