

**BIOTECHNOLOGY****Biotechnology General**

- Importance of asparagine residues at positions 13 and 26 on the amino-terminal domain of human somatostatin receptor subtype-5 in signalling 867  
S. Togawa, J. Ishii, A. Ishikura, T. Tanaka,  
C. Ogino and A. Kondo

- Control of signalling properties of human somatostatin receptor subtype-5 by additional signal sequences on its amino-terminus in yeast 875  
Y. Iguchi, J. Ishii, H. Nakayama, A. Ishikura,  
K. Izawa, T. Tanaka, C. Ogino and A. Kondo

- Refolding of difficult-to-fold proteins by a gradual decrease of denaturant using microfluidic chips 895  
H. Yamaguchi, M. Miyazaki, M.P. Briones-Nagata  
and H. Maeda

**Immunological Engineering**

- Isolation and characterization of antibodies against three consecutive Tn-antigen clusters from a phage library displaying human single-chain variable fragments 809  
K. Sakai, N. Yuasa, K. Tsukamoto,  
A. Takasaki-Matsumoto, Y. Yajima, R. Sato,  
H. Kawakami, M. Mizuno, A. Takayanagi,  
N. Shimizu, M. Nakata and Y. Fujita-Yamaguchi

- Designed horizontal transfer of stable giant DNA released from *Escherichia coli* 819  
S. Kaneko and M. Itaya

- Errata** 929

# CONTENTS Rearranged According to Subject Categories, Vol. 147, No. 6

## JB REVIEWS

- Featured article of the month.** Cellular and molecular basis for the regulation of inflammation by TGF- $\beta$  A. Yoshimura, Y. Wakabayashi and T. Mori 781

- Featured article of the month.** Regulatory mechanisms involved in the control of ubiquitin homeostasis Y. Kimura and K. Tanaka 793

## BIOCHEMISTRY

### Biochemistry General

- Expression and characterization of PKL01, an Ndr kinase homolog in *Lotus japonicus* I. Kameshita, S. Shimomura, K. Nishio, N. Sueyoshi, T. Nishida, M. Nomura and S. Tajima 799

- A minimum size homologue of Ca<sup>2+</sup>/calmodulin-dependent protein kinase IV naturally occurring in zebrafish T. Nimura, Y. Sugiyama, N. Sueyoshi, Y. Shigeri, A. Ishida and I. Kameshita 857

### Protein Structure

- Thermostability of striated and smooth adductor muscle tropomyosins from Yesso scallop *Mizuhopecten yessoensis* H. Ozawa, S. Watabe and Y. Ochiai 823

- The functional organization of the internal components of Rice dwarf virus N. Miyazaki, B. Wu, K. Hagiwara, C.-Y. Wang, L. Xing, L. Hammar, A. Higashihara, T. Tsukihara, A. Nakagawa, T. Omura and R.H. Cheng 843

- Structure of metallo- $\beta$ -lactamase IND-7 from a *Chryseobacterium indologenes* clinical isolate at 1.65- $\text{\AA}$  resolution Y. Yamaguchi, N. Takashio, J.-i. Wachino, Y. Yamagata, Y. Arakawa, K. Matsuda and H. Kurosaki 905

### Protein Interaction and Recognition

- Identification of a self-association domain in the Ewing's sarcoma protein: a novel function for arginine-glycine-glycine rich motifs? D.J. Shaw, R. Morse, A.G. Todd, P. Eggleton, C.L. Lorson and P.J. Young 885

### Enzymology

- Discrimination of porcine glycogen debranching enzyme isozymes by the ratios of their 4- $\alpha$ -glucanotransferase and amylo- $\alpha$ -1,6-glucosidase activities S. Doi, Y. Makino and K. Omichi 851

## MOLECULAR BIOLOGY

### Replication and Recombination

- The putative nuclear localization signal of the human RAD52 protein is a potential sumoylation site K. Saito, W. Kagawa, T. Suzuki, H. Suzuki, S. Yokoyama, H. Saitoh, S. Tashiro, N. Dohmae and H. Kurumizaka 833

- Interaction of human MCM2-7 proteins with TIM, TIPIN and Rb Y. Numata, S. Ishihara, N. Hasegawa, N. Nozaki and Y. Ishimi 917
