

## CONTENTS Vol. 149, No. 1

### JB Commentary

- Arkadia—beyond the TGF- $\beta$  pathway K. Miyazono and D. Koinuma 1

### JB Reviews

- Featured article of the month.* Alternative lengthening of telomeres pathway: Recombination-mediated telomere maintenance mechanism in human cells A. Nabetani and F. Ishikawa 5
- Featured article of the month.* Emerging complexity of microRNA generation cascades H.I. Suzuki and K. Miyazono 15

### Regular Papers

- Synthesis of butyl-isobutyl-phthalate and its interaction with  $\alpha$ -glucosidase *in vitro* M. Liu, W. Zhang, L. Qiu and X. Lin 27
- Recombinant domain V of  $\beta_2$ -glycoprotein I inhibits the formation of a 7-ketocholesteryl-9-carboxynonanoate and  $\beta_2$ -glycoprotein I complex Y. Zhang, W. Li, Y. Chi, R. Wang, D. Wang, F. Zhang, Z. Liu, E. Matsuura and Q. Liu 35
- Muscle injury-induced thymosin  $\beta_4$  acts as a chemoattractant for myoblasts Y. Tokura, Y. Nakayama, S.-i. Fukada, N. Nara, H. Yamamoto, R. Matsuda and T. Hara 43
- Demethylation of E-cadherin gene in nasopharyngeal carcinoma could serve as a potential therapeutic strategy Y. Ran, S. Wu and Y. You 49
- Autocrine TGF- $\beta$  protects breast cancer cells from apoptosis through reduction of BH3-only protein, Bim Y. Hoshino, Y. Katsuno, S. Ehata and K. Miyazono 55
- Visualization of polymorphism in apolipoprotein C-II amyloid fibrils C.L. Teoh, H. Yagi, M.D.W. Griffin, Y. Goto and G.J. Howlett 67
- Derivatization of haemoglobin with periodate-generated reticulation agents: evaluation of oxidative reactivity for potential blood substitutes F. Deac, B. Iacob, E. Fischer-Fodor, G. Damian and R. Silaghi-Dumitrescu 75
- Correlation between catalytic activity and monomer–dimer equilibrium of bacterial alanine racemases J. Ju, S. Xu, Y. Furukawa, Y. Zhang, H. Misono, T. Minamino, K. Namba, B. Zhao and K. Ohnishi 83
- Characterization of a novel rice kinesin O12 with a calponin homology domain N. Umezu, N. Umeki, T. Mitsui, K. Kondo and S. Maruta 91
- Mega assemblages of oligomeric aerolysin-like toxins stabilized by toxin-associating membrane proteins H. Shimada and S. Kitada 103
