

CONTENTS Vol. 150, No. 6

JB Commentary

- Recent reports about enzymes related to the synthesis of prostaglandin (PG) F₂ (PGF_{2 α} and 9 α , 11 β -PGF₂) K. Watanabe 593

JB Reflections and Perspectives

- Kunihiko Suzuki and sphingolipidoses K. Ohno 597

Regular Papers

- Structure of *Thermus thermophilus* homoisocitrate dehydrogenase in complex with a designed inhibitor E. Nango, T. Yamamoto, T. Kumasaka and T. Eguchi 607
- ZnuABC and ZosA zinc transporters are differently involved in competence development in *Bacillus subtilis* M. Ogura 615
- Biochemical characterization of human dynamin-like protein 1 Y. Zhang, X. Gao and R.M. Garavito 627
- Antiviral protection mechanisms mediated by ginbuna crucian carp interferon gamma isoforms 1 and 2 through two distinct interferon gamma-receptors T. Yabu, H. Toda, Y. Shibasaki, K. Araki, M. Yamashita, H. Anzai, N. Mano, Y. Masuhiro, S. Hanazawa, H. Shiba, T. Moritomo and T. Nakanishi 635
- NDX-1 protein hydrolyzes 8-oxo-7, 8-dihydrodeoxyguanosine-5'-diphosphate to sanitize oxidized nucleotides and prevent oxidative stress in *Caenorhabditis elegans* U. Sanada, S.-I. Yonekura, M. Kikuchi, K. Hashiguchi, N. Nakamura, S. Yonei and Q.-M. Zhang-Akiyama 649
- High resolution X-ray crystal structures of L-phenylalanine oxidase (deaminating and decarboxylating) from *Pseudomonas* sp. P-501. Structures of the enzyme-ligand complex and catalytic mechanism K. Ida, M. Suguro and H. Suzuki 659
- Establishment and characterization of hepatocytes from an Immortomouse/SMP30/GNL knockout mouse hybrid lacking vitamin C to study vitamin C transport A. Amano, S. Handa, T. Aigaki, K. Shigemoto, N. Maruyama and A. Ishigami 671
- Activation of the I κ B kinase complex by HTLV-1 Tax requires cytosolic factors involved in Tax-induced polyubiquitination Y. Shibata, Y. Tanaka, J. Gohda and J.-i. Inoue 679
- Posttranscriptional regulation of expression of plasminogen activator inhibitor type-1 by cAMP in HepG2 liver cells T. Asakura, S. Iwaki, H. Okada, B.E. Sobel and S. Fujii 687
