

CONTENTS Rearranged According to Subject Categories, Vol. 151, No. 2

JB COMMENTARY

- Role of K63-linked polyubiquitination in NF- κ B signalling: which ligase catalyzes and what molecule is targeted? M. Hayakawa 115

JB REVIEW

- Featured article of the month.** Structure, regulation and function of ghrelin T. Sato, Y. Nakamura, Y. Shiimura, H. Ohgusu, K. Kangawa and M. Kojima 119

BIOCHEMISTRY

Glycobiology and Carbohydrate Biochemistry

- Disulphide linkage in mouse ST6Gal-I: determination of linkage positions and mutant analysis Y. Hirano, T. Suzuki, T. Matsumoto, Y. Ishihara, Y. Takaki, M. Kono, N. Dohmae and S. Tsuji 197

Enzymology

- Structural insights into the substrate specificity of bacterial copper amine oxidase obtained by using irreversible inhibitors T. Murakawa, H. Hayashi, M. Taki, Y. Yamamoto, Y. Kawano, K. Tanizawa and T. Okajima 167

Enzyme Inhibitors

- Hepatocyte growth factor activator inhibitor type 1 inhibits protease activity and proteolytic activation of human airway trypsin-like protease M. Kato, T. Hashimoto, T. Shimomura, H. Kataoka, H. Ohi and N. Kitamura 179

MOLECULAR BIOLOGY

Molecular Biology General

- Terf/TRIM17 stimulates degradation of kinetochore protein ZWINT and regulates cell proliferation H. Endo, K. Ikeda, T. Urano, K. Horie-Inoue and S. Inoue 139

Replication and Recombination

- Interaction of heliquinomycin with single-stranded DNA inhibits MCM4/6/7 helicase T. Sugiyama, M. Chino, T. Tsurimoto, N. Nozaki and Y. Ishimi 129

Bioinformatics

- Biological meaning of DNA compositional biases evaluated by ratio of membrane proteins R. Sawada and S. Mitaku 189

CELL

Cell General

- TGF β -activated kinase 1 (TAK1)-binding proteins (TAB) 2 and 3 negatively regulate autophagy G. Takaesu, T. Kobayashi and A. Yoshimura 157

Receptors and Signal Transduction

- TGF- β -induced mesenchymal transition of MS-1 endothelial cells requires Smad-dependent cooperative activation of Rho signals and MRTF-A H. Mihira, H.I. Suzuki, Y. Akatsu, Y. Yoshimatsu, T. Igarashi, K. Miyazono and T. Watabe 145

- TGF- β -induced epithelial-mesenchymal transition of A549 lung adenocarcinoma cells is enhanced by pro-inflammatory cytokines derived from RAW 264.7 macrophage cells M. Kawata, D. Koinuma, T. Ogami, K. Umezawa, C. Iwata, T. Watabe and K. Miyazono 205
