

Tenth Miles International Symposium

Impact of Recombinant Molecules on Science and Society

**Kresge Auditorium, Massachusetts Institute of Technology, Cambridge,
Massachusetts
June 8–10, 1976**

This Symposium will address the mechanism of recombination of genomes at the molecular level and the implications of this basic phenomenon in living systems, including viruses, in medicine, agriculture and industry. The generation by this mechanism of new strains, or possibly new species, of plant or animal species with different biological, biochemical, immunological and related properties, has great scientific and societal significance.

Symposium Chairman:

Roland F. Beers, Jr., M.D., Ph.D.
Miles Laboratories, Inc.

Program Committee:

Frank E. Young, M.D., Ph.D. (Chairman)
University of Rochester

David Baltimore, Ph.D.
Massachusetts Institute of Technology

Sydney Brenner, Ph.D.
Medical Research Council (U.K.)

Stanley Falkow, Ph.D.
University of Washington

Daniel Nathans, M.D.
Johns Hopkins University

Eugene Nester, Ph.D.
University of Washington

Charles A. Thomas, Jr., Ph.D.
Harvard University
