

### Guest Referees

The Editors of the Journal of Membrane Biology gratefully acknowledge the valuable assistance of the following guest referees during the year 1991:

- |   |  |  |
|---|--|--|
| B.W. Ache, Florida                          | W.L. Byerly, Southern California                   | D.M. Fambrough, Johns Hopkins                      |
| D.J. Adams, Miami                           | Z.I. Cabantchik, Hebrew, Jerusalem                 | A. Fein, Connecticut                               |
| D.O. Adams, Duke                            | P. Cala, California, Davis                         | J.D. Ferraris, NIH                                 |
| W.S. Agnew, Yale                            | L.C. Cantley, Tufts                                | M. Field, Columbia                                 |
| C.C. Aickin, Oxford                         | M. Caplan, Yale                                    | A. Finkelstein, Albert Einstein                    |
| M. Akabas, Columbia                         | J.D. Cavieres, Leicester                           | G. Firestone, California, Berkeley                 |
| R.W. Aldrich, Stanford                      | D.C. Chang, Baylor                                 | B. Forbush, III, Yale                              |
| T.M. Allen, Alberta                         | J.-P. Changeux, Institute Pasteur                  | J.K. Foskett, Hospital for Sick Children, Toronto  |
| W. Almers, Washington, Seattle              | D. Chapman, London                                 | R. French, Calgary                                 |
| G. Altenberg, Texas, Galveston              | Y. Chen, NIH                                       | R.A. Frizzell, Alabama                             |
| O. Andersen, Cornell                        | W.Y. Cheung, St. Jude Children's Hospital, Memphis | O. Frohlich, Emory                                 |
| H.J. Apell, Konstanz                        | P.B. Chock, NIH                                    | E. Frömter, Max-Planck, Frankfurt                  |
| C.M. Armstrong, Pennsylvania                | H.N. Christensen, California, San Diego            | D.C. Gadsby, Rockefeller                           |
| P.S. Aronson, Yale                          | M.M. Civan, Pennsylvania                           | E.K. Gallin, Armed Forces Radiology Research Inst. |
| F.M. Ashcroft, Oxford                       | J.R. Clay, NIH                                     | P. Gardner, Stanford                               |
| D. Ausiello, Massachusetts General Hospital | J.A. Cohen, Pacific                                | K. Geering, Lausanne                               |
| W.E. Balch, Scripps Clinic                  | M. Colombini, Maryland                             | H.M. Gerschenfeld, Paris                           |
| R. Barchi, Pennsylvania                     | F. Conti, Genova                                   | G.H. Giebisch, Yale                                |
| B. Barres, College London                   | D.L. Cook, Washington, Seattle                     | N.B. Gilula, Scripps Clinic                        |
| P.H. Barry, New So. Wales                   | J.S. Cook, Oak Ridge National Laboratory           | H. Gögelein, Max-Planck, Frankfurt                 |
| T. Begenisich, Rochester                    | J. Copello, Texas, Galveston                       | D.A. Goodenough, Harvard                           |
| M. Beilby, Sydney                           | R. Coronado, Wisconsin                             | P. Graber, Max-Volmer, Berlin                      |
| D. Benos, Alabama                           | W.A. Cramer, Purdue                                | E. Gratton, Illinois                               |
