

Erratum

There were three errors in the list of reagents from the article "Transient transfection of chick-embryo hepatocytes" which appeared in the July 1993 issue (Baillie, R.A., Klautky, S.A. and Goodridge, A.G. *J. Nutr. Biochem.* 4, 431-439).

The chloramphenicol acetyltransferase (CAT) assay

buffer is composed of 100 mmol/L of Tris-HCl, pH 7.8, instead of 10 mmol/L; the homogenization buffer should read 100 mmol/L of Tris-HCl, pH 7.8, not 10 mmol/L; and sodium phosphate (0.1 mmol/L), pH 7.5, should read sodium phosphate (0.1 mol/L, pH 7.5).
