

INTRODUCTION

THE PRESENT issue of the *Journal of Steroid Biochemistry* contains the papers and discussions presented at the symposium* on "Aldosterone and active sodium transport across epithelia," which was held in Basel (Switzerland) on 23–24 July 1971. The organizing committee of this symposium was: Professor F. Koller (Honorary Chairman), Professor H. Thölen (Chairman), Professors T. Reichstein and A. Wettstein (Honorary Guests) and Dr. C. L. Voûte (Secretary). For the realization of this symposium generous help was received from Ciba-Geigy Ltd., Basel. The Editors would like to express their most sincere thanks to Dr. C. L. Voûte for his active collaboration in the preparation of the manuscripts and discussion contributions.

*(Satellite symposium to the XXV International Congress of Physiological Sciences).
