Memoirs originaux

Enzymologie

Presence of two forms of palmityl-CoA-ACP-transacylase in homogenates of <i>Mycobacterium smegmatis</i> purification using the monomer-polymer interconvertibility. <i>A. Kervabon, B. Albert and A.-H. Etemadi</i>	647
Enzymatic properties of a new type of lysozyme isolated from <i>Asterias rubens</i> : comparison with the <i>Nephtys hombergii</i> (annelid) and hen lysozymes. <i>J.-P. Périn and P. Jollès</i>	657
Transaminase B d' <i>Escherichia coli</i> . I.—Purification et premières propriétés. <i>N. Monnier, A. Montmitonnet, S. Chesne et J. Pelmont</i>	663

Physico-chimie et macromolécules

Electrophoretic studies of non-histone proteins from pig lymph nodes. <i>Z. Kilianska, L. Klyszejko-Stefanowicz</i>	677
Etude spectroscopique des modifications structurales de l'hémocyanine de scorpion induites par les variations de pH et l'addition de différents sels. <i>J.-J. Toulmé, F. Villa et M. Goyffon</i>	681

Mécanismes de régulation et génétique biochimique

Studies on Amikhellin. II.—Inhibition of DNA-polymerase from murine sarcoma leukemia virus. <i>M. Rucheton and P. Jeanteur</i>	689
Iron stimulation of ferritin synthesis. II.—Involvement of polysomal KCl extracts in the mechanism of stimulation. <i>R. Fagard, R. Saddi, F. Moisan and F. Chabaud</i>	697

Métabolisme intermédiaire et bioénergétique

Transport de l'acide amino-2-éthylphosphonique chez <i>Pseudomonas aeruginosa</i> . <i>A.-M. Lacoste, A. Cassaigne, M. Tamari et E. Neuzil</i>	703
Thiols related to mitochondrial ATPase and transports: Unmasking upon conformational changes supported by the comparative effects of ethacrynate and dihydroethacrynate. <i>D. Goldschmidt, Y. Gaudemer and D. C. Gautheron</i>	713
Nouvelles synthèses d'analogues de la S-adénosyl homocystéine et de la S-adénosyl-méthionine. <i>M. Legrauerend et R. Michelot</i>	723

Membranes, hormones et transmetteurs

Differences in cell surface proteins of drug resistant and sensitive cell lines. <i>M. Bettane, B. Hermier, J.-M. Dubert and A. Paraf</i>	731
Alpha-fœtoprotein and oestrogen metabolism. I.—Influence of alpha-fœtoprotein on the metabolism of steroids by rat liver microsomes <i>in vitro</i> . <i>C. Aussel and R. Masseyeff</i>	737

Brèves communications

Tritiation of DNA for studying molecular hybridization and reassociation kinetics. <i>A. Kovoov, M. Patillon and A. M. Michelson</i>	743
Inactivation of <i>Penicillium roqueforti</i> acid protease by specific pepsin inhibitors. <i>J.-C. Gripon</i>	747
Inhibition of sheep pancreatic lipase activity against emulsified tributyrin by non-ionic detergents. <i>P. Canioni, R. Julien, J. Rathelot and L. Sarda</i>	751
Oxygen equilibrium of chicken hemoglobin in the presence of organic phosphates. <i>J. Brygier and C. Paul</i>	755
Microestimation of glucose and glucose oxidase. <i>K. Puget and A. M. Michelson</i>	757
Effect of neuraminidase on the multiple forms of arylsulphatase B. <i>A. A. Farooqui</i>	759
